

# Weekly Coal Production

PROPERTY OF THE  
~~ENERGY INFORMATION ADMINISTRATION~~  
THE CAMBRIDGE LIBRARY OF PCAL

Production for Week Ended:  
December 16, 1989

DEC 29 1989

## Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. The Coal Exports and Imports Supplement contains annual as well as detailed monthly data on U.S. coal and coke exports and imports. This week's supplement contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price).

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1988*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800*.

## Summary

U.S. coal production in the week ended December 16, 1989, as estimated by the Energy Information Administration, totaled 19 million short tons. This was an 8 percent decrease in production from the previous week and about the same as the comparable week in 1988. Production East of the Mississippi River totaled 12 million short tons, and production West of the Mississippi River totaled 7 million short tons.

Coal consumption at electric utility plants in September 1989 totaled 63 million short tons. Following the typical consumption pattern, this was 7 million short tons lower than in August but 1 million short tons higher than in September 1988. For the first 9 months of 1989,

utility coal consumption was 572 million short tons, a slight decrease from that in the same period of 1988.

Utility coal stocks on September 30, 1989, totaled 136 million short tons. This level was 5 percent less than at the end of September 1988 and the lowest ending stock level for September in this decade.

The average price of coal receipts at electric utilities increased slightly to \$30.12 per short ton in August 1989 from \$29.27 per short ton in July. In the first 8 months of 1989, the price averaged \$30.09 per short ton, which was slightly less than in the comparable period of 1988.
